

## What is the fund's objective?

The Standard Bank Namibia Inflation Plus Fund is a unique investment designed to provide long-term capital growth and enhanced levels of short-term income. The fund's mandate is to protect clients' capital over rolling 12 month periods, which means its volatility will be lower than a pure equity or typical balanced fund.

## What does the fund invest in?

By combining a wide variety of asset classes and using novel portfolio construction, the fund aims to outperform Namibian inflation by 4% over a rolling 36-month period. Certain government issues as well as issues from top-rated corporations are included in the investment universe. The fund complies with Regulation 13 for Namibian asset requirements.

## What possible risks are associated with this fund?

The possible risks associated with this portfolio include general market and economic risks such as interest rate, bond yield and exchange rate fluctuations and geographical risk. The fund invests in secure government and corporate debt securities in Namibia, SA and globally, with numerous institutions in various industries, which reduces its risk.

<b>Initial fee (adviser)</b>	3.000%
<b>Annual fee (manager)</b>	1.500%
<b>Annual fee (adviser)</b>	0.500%
<b>Performance fee</b>	N/A

**Annual fee (manager)** – this is a service charge (% based) applicable to each class of a fund, that is levied on the value of your portfolio and includes the **Annual fee (adviser)** fee (where applicable). Annual fees are calculated and accrued daily and recovered monthly from the income awaiting distribution in the fund. The above fees do not incur VAT.

### Cost ratios (annual) including VAT as at 31 December 2020

	Class A
<b>Based on period from:</b>	01/01/2018
<b>Total Expense</b>	1.67%
<b>Transaction Costs</b>	0.20%
<b>Total Investment Charge</b>	1.87%
<b>1 Year Total Expense</b>	1.69%

**Total Expense (TER):** This ratio shows the charges, levies and fees relating to the management of the portfolio and is expressed as a percentage of the average net asset value of the portfolio, calculated over the period shown and annualised to the most recently completed quarter. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER should not be regarded as an indication of future TERs.

**Transaction Costs (TC):** This ratio shows the percentage of the value of the fund incurred as costs relating to the buying and selling of the fund's underlying assets. TC are a necessary cost in administering the fund and impacts fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of fund, investment decisions of the investment manager and the TER.

**Total Investment Charges (TIC):** This ratio is simply the sum of the TER and TC, showing the percentage of the value of the fund incurred as costs relating to the investment of the fund. It should be noted that performance figures account for all costs included in the TIC ratio, so you should not deduct the TIC from performance figures, the performance is already net of the TIC.

Unit Trusts are generally medium to long term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to future performance. Unit Trusts are traded at ruling prices and can engage in borrowing and scrip lending.

The Standard Bank Namibia Inflation Plus Fund is a unit portfolio (portfolio) of the STANLIB Namibia Unit Trust Scheme (the Scheme).

The manager of the Scheme is STANLIB Namibia Unit Trust Management Company Limited (the Manager). The Manager is an approved Management Company in terms of the Unit Trusts Control Act, No. 54 of 1981. The manager has a right to close a portfolio to new investors in order to manage the portfolio more efficiently in accordance with its mandate. The Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. A schedule of fees and charges and maximum commissions is available on request from the Manager.

The trustee of the Scheme is First National Bank Nominees (Namibia) (Pty) Ltd.

The investments of this portfolio are managed, on behalf of the Manager, by STANLIB Namibia (Pty) Ltd, a registered Investment Manager in terms of the Stock Exchanges Control Act, No. 1 of 1985.

Prices are calculated and published on each working day, these prices are available on the Manager's website (<http://ww2.stanlib.com/Namibia>) and in Namibian printed news media. This portfolio is valued at 15h00. Forward pricing is used. Investments and repurchases will receive the price of the same day if received prior to 15h00.

This portfolio is permitted to invest in foreign securities. Should the portfolio include any foreign securities these could expose the portfolio to any of the following risks: potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks; settlement risks; and potential limitations on the availability of market information.

All performance returns/figures quoted are shown in NAD and are based on data sourced from Morningstar or Statpro and are as at 31 March 2021.

Annualised return figures are the compound annualised growth rate (CAGR) calculated from the cumulative return for the period being measured. These annualised returns provide an indication of the annual return achieved over the period had an investment been held for the entire period. Actual annual figures are available on request from the Manager.

Portfolio performance figures are calculated for the relevant class of the portfolio, for a lump sum investment, on a NAV-NAV basis, with income reinvested on the ex-dividend date. Individual investor performance may differ due to initial fees, actual investment date, date of reinvestment of income and dividend withholding tax. Portfolio performance accounts for all costs that contribute to the calculation of the cost ratios quoted, all returns quoted are after these costs have been accounted for.

Statistics - Positive Months: the number of individual 1 month periods during the specified time period where the return was not negative; Max Gain: the maximum gain in a trough-to-peak incline before a new trough is attained, quoted as the percentage between the trough and the peak. It is an indicator of upside risk over a specified time period (quoted for all periods of 1 year or longer); Max Drawdown: the maximum loss in a peak-to-trough decline before a new peak is attained, quoted as the percentage between the peak and the trough. It is an indicator of downside risk over a specified time period (quoted for all periods of 1 year or longer, where blank no loss was experienced); Highest and Lowest: the highest and the lowest 1 year return (%) that occurred during the specified time period (quoted for all relevant classes launched 1 year or more prior to current month end date).
